

S265 APPLICATION EXAMPLE

The S265 is a very versatile system for PA. systems as you can see in this application example. By using the four poles of a speakon NL4FC to connect both channels of a 2x1200W. @ 2 Ohms amplifier and the switch incorporated in the S265 to select to which channel you wish to load the cabinet, up to sixteen S265 can be connected with a single 2 pair cable, loading 8 S265 to each amplifier's channel.
